DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the abstract of the disclosure should be one paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed subject matter in claims 1-4, the steps for encoding first signal, second signal and selecting of PN codes in claims 1-4 is not disclosed proper. As figures 3 and 6 describe best to the claimed subject matter in claims 1-4, no reference is made to the elements in those figures.

Further, the claimed correlating the first communication signal in claim 4 and scrambling first and second communication signals in claim 5 are not disclosed in the specification.

Art Unit: 2631

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by **Minn et al.** (US patent number 6,088,347).

Minn et al. (Minn hereinafter) teaches a spread spectrum communication system figures 6 and 13 comprising: spreading the first information source (21-1 in fig.1 and c[n]) using a first spreading code p[n]; spreading a second information signal (21-2 and c[n]) using a second spreading code having a relative low cross correlation with respect to the first spreading code (see the abstract of the disclosure) as in claim 1. Wherein the selection of the spreading code is inherent in the process when finding a minimum cross-correlation of the psuedo random codes.

Further to claims 2-3, and 6 Minn also teaches that:

The first signal is multiplied by a first Walsh code (W[n,1] in fig. 6 and W[n] in fig. 13); the second signal is multiplied by a second Walsh code (W[n,2] in fig. 6 and W[n] in fig. 13); and the Walsh modulated first and second signals are modulated by their respective PN codes as in claims 2 and 3; and the spreaded first—to-K signals in fig. 6 are modulated (see multiplier 33) using a single carrier frequency as in claim 6.

Art Unit: 2631

Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 5,767,738, 5,771,229, 5,805,584, 6,404,732 and Re 32,905 issued to Brown et al., Gavrilovich, Kingston et al., Van Nee and Baran respectively disclose a multi-user spread spectrum transmitter having means for selecting pseudo random codes having minimum cross-correlation.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tesfaldet Bocure whose telephone number is (571) 272-3015. The examiner can normally be reached on Mon-Thur (7:30a-5:00p) & Mon.-Fri (7:30a-5:00p).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mohammad H Ghayour can be reached on (571) 272-3021. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
